

Nissan Pilest, MD

Total Dermatology

Dr. Nissan Pilest is a board certified dermatologist dedicated to the art of aesthetic dermatology. He has developed a national reputation with his dermatology practice, treating both medical and cosmetic patients, beginning in 1979. Dr. Pilest has practiced in Orange County, California for over 34 years.

Dr. Pilest's career has been driven by a passion and commitment to advancing the success of aesthetics and dermatology by providing a wide range of aesthetic procedures at his practice, Total Dermatology, in Irvine.

Throughout his journey to create a practice where patients have access to the highest quality and most innovative technologies available, Dr. Pilest has invested countless hours researching a range of state-of-the-art devices. He has done this to ensure that his patients have access to tools

which will enhance all of their dermatological needs.

Recently, Dr. Pilest has been educating other physicians on his "Total Solutions" approach by offering the latest in technologies to his patients for skin resurfacing and rejuvenation, skin tightening and body contouring. "I pride myself with providing my patients with the best technology available today and Fraxel®, Thermage®, Clear + Brilliant®, and Liposonix® are the leaders at what they do," says Dr. Pilest.

Fraxel and Clear + Brilliant are designed to help slow and address the signs of aging on the skin, and the deep heating energy of Thermage helps strengthen the collagen in loose, sagging skin, giving patients' skin a smoother, healthier look and feel.

Dr. Pilest's latest addition is Liposonix. Liposonix is a proven, unique and effective aesthetic device built on ultrasound technology to deliver Custom Contouring™ fat reduction. Liposonix ultrasound energy is focused in the subcutaneous fat layer beneath the skin, eliminating unwanted fat cells around the waist in a one-hour treatment with results averaging in a one-inch reduction (or one dress or pant size).

Whether your concern is acne, wrinkles, sun damage or skin laxity, Dr. Pilest has both the most advanced technology and current expertise to address virtually every dermatological issue.
