

No surgery. No injections. No downtime.

## Fight cellulite in a single round

Introducing the NEW Cellulite procedure by Thermage

Other non-invasive treatments for cellulite require multiple treatments to improve the appearance of dimpling. Not Thermage. In only one treatment, patients have reported smoothing of dimples on thighs and buttocks with long lasting results.

FDA cleared for the temporary improvement in the appearance of cellulite.

Side effects are generally mild and may include redness, swelling, blisters, bumps and rare instances of surface irregularities.

Before Thermage

6 Months Post Treatment

Single treatment by Silvia Cuevas, M.D.

"The improvements in this patient have been and continue to be impressive. She also decided to have the *Face by Thermage™* procedure because of the results she saw with the cellulite treatment."

- Silvia Cuevas, M.D.

All Before and After photos are un-retouched and represent patients who have had significant results. Results vary depending on age and skin condition. FDA cleared for the non-invasive treatment of wrinkles and rhytids, including the upper and lower eyelids and for the temporary improvement in the appearance of cellulite. © 2008 Thermage, Inc
